

Team ID	6	Assessors	CD/CG	Grade	18 /20
---------	---	-----------	-------	-------	--------

Constraint Violations (Check those that apply. Each incurs -0.5 penalty)

- ☐ **Failed to** have at least $n+1$ credible design concepts for further development and consideration
- ☐ **Failed to** demonstrate that your process has made use of divergence tools to overcome cognitive biases
- ☐ **Do not** have prototypes for all design concepts being discussed, including at least **one** (≥ 1) **physical** prototype.

Characteristics	U	S	G	O*
Quality of engineering argument, with emphasis on justifying claims through credible use of engineering-appropriate sources	☐	☐	☒	☒
Usefulness of the engineering requirements and evaluation criteria to support decision making about design concepts.	☐	☐	☒	☒
Quality of the learning generated by applying engineering tools for diverging and representing (e.g. prototyping) candidate design concepts.	☐	☐	☒	☒
Quality of the concepts under consideration, as demonstrated by the representations, preliminary assessment against requirements, diversity of approaches, and plans for development.	☐	☐	☒	☐
Effectiveness of teamwork during the discussion that demonstrates both integrated and mutually supportive contributions.	☐	☐	☒	☒
Clarity and integration of oral, visual, physical, and written communication.	☐	☐	☒	☒
Ability to participate in meaningful, professional-style conversation with key stakeholders.	☐	☐	☒	☐

Holistic Comments

Great design process awareness
 You did a great job incorporating engineering standards
 Excellent diversity in your concepts, very impressive
 We were really impressed by your organization. You were able to seamlessly provide evidence to support answers to our question
 We also appreciated how you systematically chose your brief, especially having a left handed writer
 Good evidence of teamwork

Areas for improvement:
 We were a little unclear on how you planned on testing
 While you haven't done an official convergence, you seemed to favour the double marker solution.

* U S G and O refer to Unsatisfactory, Satisfactory, Good, and Outstanding for a particular characteristic. Refer to the IAT for the descriptions of these for each characteristic.
